

## Census date information and calculation

A census date is the deadline by which you must take certain actions, such as "dropping a class without a financial penalty". Census dates apply to each class or 'unit of study' you are enrolled in. The vocational education census dates are applicable to RMIT students enrolled in a vocational education program, including apprentices and trainees. Census dates cannot be extended.

Each vocational education class has a different census date, which depends on:

- the month that classes started
- the length of the class

## Nominal hours

The term "nominal hours" refers to the average learning and teaching effort required to fulfil the requirements of a course or program. These hours provide a basis for the student tuition fee for the selected course or program. The total number of nominal hours required to complete each program varies. The nominal hours for a program may also vary depending on the electives chosen.
