

Position Description – Senior Lecturer

Position Details

Position Title:	Senior Lecturer
College/Portfolio:	STEM College
School/Group:	School of Engineering
Campus Location:	Based at City campus but may be required to work and/or be based at other campuses of the University.
Classification:	Academic Level C
Employment Type:	Continuing position
Time Fraction:	1.0FTE

RMIT University

RMIT is a multi-sector university of technology, design and enterprise with more than 96,000 students and close to 10,000 staff globally. The University's mission is to help shape the world through research, innovation and engagement, and to create transformative experiences for students to prepare them for life and work.

<https://www.rmit.edu.au/about>

<https://www.universitiesaustralia.edu.au/university/rmit-university/>

Our three main campuses in Melbourne are located in the heart of the City, Brunswick and Bundoora. Other locations include Point Cook, Hamilton and Bendigo, two campuses in Vietnam (Hanoi and Ho Chi Minh City) and a centre in Barcelona, Spain. RMIT is a truly global university.

<https://www.rmit.edu.au/about/our-locations-and-facilities>

We are also committed to redefining our relationship in working with, and supporting, Indigenous self-determination. Our goal is to achieve lasting transformation by maturing our values, culture, policy and structures in a way that embeds reconciliation in everything we do. We are changing our ways of knowing, working and being to support sustainable reconciliation and activate a relationship between Indigenous and non-Indigenous staff, students and community. Our three campuses in Melbourne (City, Brunswick and Bundoora campuses) are located on the unceded lands of the people of the Woi Wurrung and Boon Wurrung language groups of the eastern Kulin Nation.

Why work at RMIT University

Our people make everything at the University possible. We encourage new approaches to work and learning, stimulating change to drive positive impact. Find out more about working at RMIT University, what we stand for and why we are an Employer of Choice.

STEM College

The STEM College holds a leading position and expertise in the science, technology, engineering, mathematics and health (STEM) fields. We are uniquely positioned to influence and partner with industry, as never before.

STEM College is a community of exceptional STEM researchers, teachers, inventors, designers and game-changers, supported by talented professional staff. We offer higher education programs across all STEM disciplines at the Bachelor, Master and PhD levels, and ensure our students experience an education that is work-aligned and life-changing.

The College is renowned for its exemplary research in many STEM areas including advanced manufacturing and design; computing technologies; health innovation and translational medicine; nano materials and devices; and sustainable systems. Our brilliant researchers attract funding from government and industry sources.

Industry is at the heart of what we do. It ensures our research has real world impact, and our students are truly work-ready. Under the leadership of DVC STEM College & Vice President, Digital Innovation, we have established new hubs of industry-connected digital innovation and endeavour and are engaging with global STEM organisations at scale.

Our diversity and shared values empower our work, and we are proud of the College's inclusive, caring culture. We offer a safe, dynamic work environment, and support every member of our community to achieve their potential. The College appointed Victoria's first ever Dean of STEM, Diversity & Inclusion in 2020, and this role drives gender equity, diversity and inclusion strategies across the College.

STEM College employs 1,000 staff who deliver onshore and offshore programs to approximately 20,000 students.

We are here to positively impact the world and create the next generation of STEM leaders.

School of Engineering

The School of Engineering is one of the largest Engineering Schools in Australia. It has over 350 staff and 7000 students, including 750 HDR students. The School is committed to driving innovation and collaboration through our industry partnerships. Our industry partners range from small companies to multinational organisations and we work together on translating our research into impact for our partners and the wider community.

The School has six Departments:

- Aerospace Engineering
- Biomedical Engineering
- Chemical and Environmental Engineering
- Civil and Infrastructure Engineering
- Electrical and Electronic Engineering
- Mechanical, Manufacturing and Mechatronics Engineering

In 2023 the School developed a new strategic plan, which will see an increasing emphasis on engagement with industry and other external partners. The School is developing new industry led degrees, where our students learn whilst working for companies, as well as innovation hubs where we will co-locate industry partners, our research teams and our undergraduate students.

Over the next three to five years the School of Engineering will support these new strategic plans through investments in new facilities. This will include reimaging our teaching laboratories, where we will use new digital technologies to enhance the student experience, as well as research labs where partnerships with industry will

enable us to maintain leading research facilities. The STEM College is also developing plans for a large new building in the Melbourne City Campus, and the School of Engineering is expected to hold significant space in this new building.

RMIT is a global university, and the School of Engineering has students and research partners across South East Asia and Europe. This includes two campuses in Vietnam, as well as partnerships in Hong Kong, Singapore and we recently entered into a partnership with the Birla Institute of Technology and Science in India. The School also has a research centre in Barcelona, which provides access to European funding and industry partners. The School will continue to grow our international activities with the aim of becoming a globally connected School that translates technologies and training across continents.

Department of Electrical & Electronic Engineering

The Department of Electrical & Electronic Engineering is one of the largest departments in the university and carries a high level of reputation for its huge success in research and innovation. It houses internationally renowned academics recognised for their fundamental and original contributions to the field and is highly successful in acquiring large amount of research grants supporting more than 50 researchers. The key research areas in the department include photonics and optical systems, sensors, materials and electronic manufacturing, power and automation/control, and communication networks.

In 2024, the department's research grant income exceeded \$10 million, with nearly \$50 million secured over the past five years.

The Department's recent success in leading a \$70M research centre, the Australian Research Council Centre of Excellence in Optical Microcombs for Breakthrough Science (COMBS), is transforming the world's most accurate measurement tool-the optical frequency comb - from large and complex laboratory based research instrumentation into a chip the size of a fingernail. The centre aims to create impact spanning spectroscopy, microscopy, astronomy, precision measurement and telecommunications. In the electronic manufacturing area for transforming ideas into products, the University has established a research hub together with the State Government called the D2D (discovery to device) facility which is led by the Department. The \$15M small volume manufacturing D2D capability transforms ideas into products through prototyping and upscaling to create real-world impact. The Centre for Opto-electronic Materials and Sensors (COMAS) pioneers revolutionary materials through atomic-level manipulation, making fundamental advances in miniaturised, atomically-thin devices that integrate optics, electronics, signal processing and AI with brain-like computing tailored to deployment scenarios. The Department recently has established the first national centre for electrification in Australia funded by the ARC through the Industrial Transformation Training Centre (ITTC) in Electrifying Australia for a Net-zero Future. The Department has very strong engagements with the defence industry and the Department of Defence through the Defence Science & Technology Group (DSTG). The area of research are multi-aperture radars to the design & development of RF systems, antennas and materials, and the development of novel space & wireless communications techniques for improved resilience and security.

The department provides a diverse range of programs for undergraduate and postgraduate students. Undergraduates can pursue single degrees in Electrical Engineering, Electronic & Computer Engineering, or Software Engineering, along with two double-degree options. Postgraduate students have three degree program choices. The curriculum spans various crucial areas, including;

- Electrical, Power, Control and Automation,
- Analog and Digital electronics,
- Embedded, Computer and Software
- Communication and Networks

The Department also delivers offshore teaching programs in Hong Kong and India. The department has a wide range of industry partnerships ranging from funded research projects, work integrated learning, student placements and student project co-supervisions. Our graduates are highly regarded by the industry for having extensive hands-on experience and practical knowledge delivered through our teaching programs using a vast range of state-of-the-art laboratory facilities.

Position Summary

The Senior Lecturer will contribute to the teaching and research efforts of the School. You will make a significant contribution to the delivery of programs and to be actively involved in research, consulting and other professional activities.

As the Senior Lecturer, you will develop, engage in and lead high quality research projects, that are aligned with the University's research focus areas, to achieve success in attracting research funding and to produce high quality outputs. You will have an important research leadership role in embedding your research expertise into the life of the School and will be required to develop high-quality, productivity-driven networks across RMIT and with local, national and global, internal and external partners.

The Senior Lecturer may have responsibility for program management.

Reporting Line

Reports to: Head of Department, Department of Electrical and Electronic Engineering or Discipline Leader in the same Department

Organisational Accountabilities

RMIT University is committed to the health, safety and wellbeing of its staff. RMIT and its staff must comply with a range of statutory requirements, including equal opportunity, occupational health and safety, privacy and trade practice. RMIT also expects staff to comply with its policy and procedures, which relate to statutory requirements and our ways of working.

Appointees are accountable for completing training on these matters and ensuring their knowledge and the knowledge of their staff is up to date.

Key Accountabilities

1. Deliver and provide original contributions in teaching and/or scholarship which expand knowledge in electrical engineering, including designing, conducting and moderating assessment, implementing improvements informed by course evaluation activities and student feedback. Teaching commitments can include offshore fly-in fly-out (FIFO) delivery.
2. Conduct and lead high quality research in electrical engineering related areas specifically power-grids, microgrids, energy storage, power electronics, electrical machines, high voltage systems and electrification recognised at the national level: developing highly successful research teams; managing research projects and programs within timelines and budget and ensuring compliance with quality and reporting requirements; regularly publishing research results in high quality outlets as lead author and in collaboration with other researchers; identifying appropriate funding sources and prepare successful external research funding submissions; supervising higher degree by research candidates.
3. Participate in School and College strategy development and governance and make a significant contribution to administration activities of an organisational unit or an interdisciplinary area at undergraduate, honours and postgraduate level, which may include program management of a large award program or a number of smaller award programs.

Key Selection Criteria

1. Demonstrated ability to coordinate and teach large courses in electrical engineering; and prepare and deliver programs at undergraduate and post-graduate levels, including high quality curriculum and program materials and ability to implement innovative approaches to student-centred learning and quality improvement.
2. Ability to manage a large program or a number of small programs.
3. Demonstrated ability to support student issues related to effective learning.
4. Emerging nationally recognised research track record in electrical engineering related areas specifically power-grids, microgrids, energy storage, power electronics, electrical machines, high voltage systems and electrification including substantial record of research outputs in high quality outlets.
5. Experience in research leadership with the ability to build and develop collaborative research teams, mentor academic staff to deliver high quality outcomes, attract and secure external research funding to sustain research effort and manage funded research projects including complex budgets and reporting requirements.
6. Extensive experience in supervising higher degree by research candidates to maximise research performance.

7. Demonstrated ability to manage academic program teams, supporting scholarly development of less experienced academic staff.
8. Demonstrated understanding of and commitment to financial, governance and quality management systems within a university.
9. Demonstrated high level of interpersonal, communication and negotiating skills including the ability to consult with senior executives, external bodies, produce executive reports, negotiate agreed directions, outcomes and targets within a collaborative environment.

Qualifications

Mandatory: PhD or equivalent¹ in relevant field.

Note: Appointment to this position is subject to passing a Working with Children Check and other checks as required by the specific role. Maintaining a valid Working With Children Check is a condition of employment at RMIT.

¹ Equivalence is defined in the exemption criteria at **Appointment of staff without Doctoral qualifications** instruction
