Notes

The scale % AGREE is calculated by adding up all the items which scored Agree or Strongly Agree across all respondents

This is divided by the total number of items answered across all respondents. Blanks or N/A's are excluded

Percentages represent the %age of the total valid responses per question, with the exception of the demographics section which represent the %age of total responses.

Charts are rescaled on valid responses to total 100%.

Values may round to 101 %.

To calculate Mean Scores responses given by students are converted to a score between 0 and 100.

e.g., Strongly disagree=0, Disagree=25, Neutral=50, Agree=75, Strongly agree=100, for 5 point scales.

Mean values for a scale are determined by calculating the weighted average of these scores .

e.g., the mean for a set if questions with responses of Strongly disagree, Disagree, Neural, Agree and Strongly Agree is calculated as follows:

The number of "Strongly disagree" responses multiplied by 0 plus the number of "Disagree" responses multiplied by 25 plus the number of "Neutral" responses multiplied by 50 plus the number of "Agree" responses multiplied by 75 plus the number of "strongly Agree" multiplied by 100.

This is then divided by the total number of responses.

The result can be thought of as representing the position of the average response within the range of possible responses.

Valid responses exclude N/A and blank responses.
