Notes

To calculate Mean Scores and Percent In Agreement values, responses given by students are converted to a score between 0 and 100.

e.g., Not at all=0, Very little=25, Some=50, Quite a bit=75, Very much=100, for 5 point scales

e.g., Never=0, Sometimes=33.33, Often=66.67, Very often=100, for 4 point scales

Mean values for a scale are determined by calculating the weighted average of these scores

e.g., the mean for a set of questions with responses of Never, Sometimes, Often and Very often is calculated as follows:

The number of "Never" responses multiplied by 0 plus the number of "Sometimes" responses multiplied by 33.33 plus the number of "Often" responses multiplied by 66.67 plus the number of "Very often" responses multiplied by 100. This is then divided by the total number of responses.

The result can be thought of as representing the position of the average response within the range of possible responses.

Percent in Agreement is calculated as follows. First, students who did not answer a significant proportion of the questions in a set are excluded from the calculations for that set, e.g., for the Learner Engagement scale, students who answer fewer than 5 of the 7 questions in this set are excluded.

The average score is then calculated for remaining students; those with an average score equal to or above 55 are regarded as being "In Agreement" while those with an average score below 55 are regarded as being "Not in agreement" with this set of questions.

The Percent in Agreement value is then the number of students found to be "In Agreement" divided by the number of students that were included.

The number of responses is shown for each question and the number of students included in the calculation for each set is also shown.

Overall Quality is based on the question: "Overall how would you rate the quality of your entire educational experience this year?"

Some values may appear as 101 % due to rounding.

Valid responses exclude N/A and blank responses.
