Notes

The Social Research Centre (SRC) uses a new method to evaluate scales such as Trainer Quality. The original method simply added the number of responses which were "Strongly Agree" or "Agree" for all 6 GTS questions and divided this by the number of actual responses. This is the Percent Agree value for the scale. Blanks, D/A and N/A are excluded.

The new method counts students rather than responses. Firstly, students who did not answer at least 4 of the 6 questions are excluded from the calculation. Responses for the remaining students are then converted to a value between 0 and 100 (Strongly Disagree=0, Disagree=25, Neither=50, Agree=75, Strongly Agree=100). Students with an average below 55 are regarded as "Not In Agreement".

The Percent Agree value is then the number of students In Agreement expressed as a percentage of all students that were not excluded.

The new method for calculating overall satisfaction uses responses only to Q9: Overall, I am satisfied with the training.

Percentages represent the percentage of total valid responses per question, with the exception of the demographics section which represent the percentage of total responses.

Charts are rescaled on valid responses to total 100%.

The sum of the percentages may be 99% or 101% in some cases due to rounding.

Valid responses exclude N/A and blank responses.
