

Bachelor of Applied Science (Health and Physical Education)

2018

Undergraduate

Share your passion for health and physical wellbeing with the next generation.

If you're passionate about physical fitness, sport, recreation and wellbeing, then RMIT's Bachelor of Applied Science (Health and Physical Education) will give you the qualifications you need to teach secondary school students the importance of healthy lifestyles.

As an RMIT student, you'll develop the skills you need to teach students team and individual sports and introduce them to life long recreational activities like walking and swimming.

You'll also gain a second teaching method, which can include biology, health or maths.

Over the course of your studies you'll take part in more than 80 days of professional practice, in traditional and not so traditional settings, to ensure you graduate work-ready.

Who is this degree for?

This degree is perfect for those interested in the health and wellbeing of the next generation.

You'll be exposed to a broad study of exercise sciences (anatomy, physiology, exercise physiology, biomechanics, kinesiology, motor learning), sport and physical activity, and their application to the teaching of health, physical education and sport in schools, as well as coverage of key health issues.

At the end of your degree, you'll graduate with a globally recognised qualification that allows you to teach in secondary schools.

What are my career outcomes?

You'll be qualified to work as a health and physical education teacher in secondary schools and in less-traditional educational settings.

You'll also have the skills, knowledge and experience to engage in policy and consulting work in private enterprise, government agencies and community services organisations.

Liana Kitsou

Bachelor of Applied Science (Health and Physical Education)

I was drawn to RMIT because I had heard how good the degree was and the endless opportunities it provided.

Right from the start I had the opportunity to complete placement in schools. These experiences gave me real insight into teaching and helped me to develop confidence, patience and strategies needed to teach successfully.
