Psychology
Psychology

Caring for the community

Psychology is the study of mental functions and behaviour. Biological, psychological (thoughts, emotions and behaviours) and social factors play significant and interactive roles. Psychology at RMIT has a proud history of high-quality teaching, research and community service and is known for its application of psychology to real-life problems.

How to become a psychologist at RMIT

Step 1
Undergraduate degree

Choose from:

3 years
- Bachelor of Applied Science (Psychology)
- Bachelor of Social Science (Psychology)
- Bachelor of Criminology and Psychology

or

5 years
- Bachelor of Social Work (Honours)/Bachelor of Social Science (Psychology)

Step 2
Honours degree

1 year
- Bachelor of Applied Science (Psychology) (Honours)

After completing your honours degree, you qualify for registration as a provisional psychologist.

Continue on to step 3 to become a registered psychologist.
RMIT is focused on providing practical solutions to real-life problems, developing and applying knowledge and new ways of thinking about health and wellbeing, as well as better understanding the ever-increasing role that technology plays in how we function.

At its City and Bundoora campuses, RMIT offers a full suite of Australian Psychology Accreditation Council (APAC) programs at undergraduate and postgraduate levels. Psychology at RMIT has research expertise in the areas of clinical and health psychology, behavioural neuroscience, lifespan developmental psychology, and cross-cultural psychology. New areas of research include chronic disease and the ageing population.

The main areas of focus include:
- psychobiology of cognition
- stress, fear and anxiety
- wellbeing and resilience
- development across the lifespan
- innovations in clinical interventions
- mental health.

Health Sciences Clinic

Located at Uni Hill, RMIT’s Health Sciences Clinic provides clinical training for clinical psychology, Chinese medicine, chiropractic and osteopathy students to meet registration requirements and to prepare for independent practice upon graduation.

RMIT’s clinical psychology service offers high-quality support for children, adolescents and adults. It allows postgraduate students, registered as provisional psychologists, the opportunity to treat the general public under the supervision of senior clinical staff, all of whom are registered practitioners.

www.rmit.edu.au/healthsciences/clinic

Stefanie Gill-Renouf (cover image)

I am so thankful for the close group of friends I made within the program, and the chance to work with children and their families in the RMIT psychology clinic.

RMIT’s Health Sciences Clinic was a major drawcard in studying my postgrad qualifications here. It’s a beautiful clinic with so many fantastic resources to use when seeing clients.
Bachelor of Applied Science (Psychology)

Psychology is the science of the mind and human behaviour. RMIT’s psychology program applies research to actual situations to resolve real human problems. You will examine mental states and processes and how they affect human behaviour.

The program is the basis for further study if you want to become a practising psychologist or use your study in other careers.

Career outlook
Psychology is a broad field with many areas of specialisation including counselling, sport psychology, educational psychology, organisational psychology, and forensic psychology.

To register as a psychologist, you’ll need to complete the Bachelor of Applied Science (Psychology), the Bachelor of Applied Science (Psychology) (Honours) and the Master of Psychology (2 years full-time), or equivalent programs recognised by the Australian Psychological Society.

Psychologists work in a wide range of environments, from hospitals to universities, general medical practices, community health centres and more.

Professional recognition
The psychology major in the Bachelor of Applied Science (Psychology) is a partial requirement for membership of the Australian Psychological Society (APS).

psychology.org.au

It is also a partial requirement for registration as a psychologist with the Psychology Board of Australia, subject to further study or clinical practice.

psychologyboard.gov.au

This program has been accredited with the Australian Psychology Accreditation Council.

Program structure
The psychology component of the degree is 25 per cent of first year, 62.5 per cent of second year and 62.5 per cent of third year.

The remaining courses include occupational health and safety, nutrition, applied psychology, disability studies, health statistics, computer science and geography.

The program includes a research project where you work one-on-one with staff on staff-initiated research projects, and you’ll also have the option of completing a 15-day industry placement.

Year One
You’ll study the principles of psychology – personality, psychopathology and social psychology – as well as these foundation areas:

- biological bases of behaviour including brain-behaviour relationships, sensation, perception and consciousness
- theories of learning, memory and cognition (including theories of intelligence)
- theories of emotion, motivation and stress.

Year Two
You’ll study biological, cognitive, developmental and social psychology, as well as research methods in psychology.

Year Three
The third year includes philosophy and methodology of psychology, psychological assessment and individual differences, psychology in society and organisations, psychopathology and models of intervention, and a research project.

Entry requirements
Year 12 prerequisites
Units 1 and 2 – Mathematics (any).
Units 3 and 4 – a study score of at least 20 in one of Geography, Mathematics (any) or Science (any); and a study score of at least 30 in English (EAL) or at least 25 in English other than EAL.

Additional Information
- Non-Year 12 applicants may submit additional information if they would like it to be considered. For Semester 1 intake, this can be completed through the VTAC Personal Statement online. For Semester 2 intake, this can be completed through the personal statement in the Apply Direct application.
- Students must hold a valid Working with Children Check prior to undertaking the clinical components of this program.
- Students must present evidence of a successful National Police Records Check prior to undertaking the clinical components of this program.

Program snapshot
Program code: BP154
Duration
Full-time: 3 years
Location
City or Bundoora campus
For the Bundoora-based program, the first year is conducted on the Bundoora campus. Years 2 and 3 are conducted on the City campus.

Selection mode
City: ATAR (2018: 68.10)
Bundoora: ATAR (2018: 65.15)

Lidia Oppedisano
Bachelor of Applied Science
(Psychology)

This program has refined my problem-solving and organisational skills, and taught me how to actively listen and accept individual differences.
Psychologists support the health and wellbeing of individuals and society through one-to-one counselling as well as designing and implementing policies and campaigns. This program is designed for people looking for a social science degree with a psychology specialisation.

Career outlook
This program provides opportunities to gain key skills, such as communication, policy development, research and management, which are all transferable across many areas of employment.

As a graduate, you’ll enjoy excellent employment prospects in the public, private and community sectors.

The skills learned in this program are especially relevant to areas such as child protection, human resource management, education, welfare and the health sector and in community-based agencies.

You could work in:
- federal and state government departments
- disability services
- rehabilitation services
- community development programs
- dispute mediation
- employment placement and case management
- equal employment opportunity program development.

Professional recognition
The psychology major in the Bachelor of Social Science (Psychology) is a partial requirement for membership of the Australian Psychological Society (APS).

psychology.org.au

It is also a partial requirement for registration as a psychologist with the Psychology Board of Australia, subject to further study or clinical practice.

psychologyboard.gov.au

This degree is ideal for those who plan to work in areas that call for a grasp of the insights, traditions and practices of psychology and the social sciences, such as:
- human services organisations
- community-based agencies

- human resource management
- multicultural agencies
- educational settings.

This program incorporates a 20-day industry-based field placement offering hands-on, practical experience with a professional organisation of your choice.

You can undertake further study to qualify as a clinical psychologist, or alternatively apply your training in psychology and sociology to diverse fields such as education and training, health and welfare, and human resource management.

This program is also available as a double degree: Bachelor of Social Work/Bachelor of Social Science (Psychology).

Program structure
This degree is based in the social sciences with a comprehensive psychology specialisation comprising 12 APAC accredited psychology courses; 9 social sciences courses; 3 electives

Entry requirements
Year 12 prerequisites
Units 3 and 4 – a study score of at least 30 in English (EAL) or at least 25 in English other than EAL.

Pathways
Graduates of the following RMIT programs maybe eligible for exemptions (subject to certain criteria):
- Diploma of Community Services
- Diploma of Alcohol and Other Drugs
- Diploma of Youth Work

rmit.edu.au/programs/bp112

Freya Cristea
Bachelor of Social Science (Psychology)

This program prepares you for the workforce by teaching professional practices, such as communication in culturally and linguistically diverse situations, addressing other individuals and exploring real-life scenarios.
Bachelor of Applied Science (Psychology) (Honours)

This honours program is accredited by the Australian Psychological Accreditation Council (APAC). It introduces you to professional issues, theories, and methods of data analysis in contemporary research psychology.

The program will prepare you for further postgraduate studies in the Master of Clinical Psychology, as well as postgraduate research.

Career outlook
The program's teaching methods and approaches to learning are designed to prepare you for postgraduate studies in psychology (e.g. Master of Clinical Psychology or postgraduate research). You'll also be equipped with the skills to enter employment in workplaces that value knowledge and training in psychology, such as, human resources or psychosocial rehabilitation.

Human services organisations offer many work opportunities. Typically, provisional psychologists work in education, human services and in community medicine supervised by experienced registered psychologists.

Professional recognition
The program is accredited by the Australian Psychology Accreditation Council (APAC).

Graduates are eligible for associate membership of the Australian Psychological Society (APS) and are eligible to apply for provisional registration, allowing them to practise in any Australian state or territory.

To be eligible to apply for full registration as a psychologist, you must complete the Master of Clinical Psychology.

The Psychology Board of Australia standards and guidelines determine that all applicants for registration need English language skills at IELTS academic level 7.0, or equivalent, within the two years preceding registration.

Program structure
As well as lectures and group work, you'll also have online resources available to guide your learning experience.

The program consists of 96 credit points. You will complete six courses (a mix of 12 or 24 credit points each).

The program will provide you with a thorough education in the scientific discipline of psychology and introduce you to the application of the discipline.

As a graduate you will have sound evidence-based knowledge as a foundation for entering either employment, where the knowledge and approaches of psychology can be used, or advanced level psychology programs (e.g. Master of Clinical Psychology or a postgraduate research degree).

Entry requirements
Applicants must have:
- successfully completed an APAC-approved three-year psychology sequence with a GPA of at least 2.0 out of 4.0 and a cumulative percentage average of at least 75 per cent in each year of study; or
- any undergraduate degree and successful completion of an APAC-approved fourth year of study in psychology, with a cumulative percentage average of at least 75 per cent in each year of study.

Robert Potter

Bachelor of Applied Science (Psychology) (Honours)

A real highlight of my studies has been the opportunity to gain practical experience, working as a provisional psychologist with high-quality supervision at the RMIT Health Sciences Clinic.
Bachelor of Social Work (Honours)/Bachelor of Social Science (Psychology)

Social workers and psychologists often work side-by-side in organisations where a balance of expertise in both areas is required.

This social work and psychology double degree combines our two highly respected social work and social science programs to give you a unique, broad grounding across both areas.

This program will increase your knowledge and understanding of human development, needs and problems, and how such factors interact within individual, group, organisational, community and policy contexts.

You will be prepared for employment in general social work practice and settings requiring an understanding of psychology. You will be equipped to apply interdisciplinary knowledge of Australian society, social issues and social problems.

Career outlook
Graduates are highly employable in human services organisations, community-based agencies, various levels of government and increasingly in corporate and private enterprise.

This program provides key transferable skills, such as communication, policy development, research and management, that you can apply in many fields of employment.

Some graduates help to develop social policy, some engage in research, some assist communities to develop their own services, and some provide services to individuals and families. There are ample opportunities to pursue different specialisations and interests.

As a graduate, you could work as a social worker, psychologist, counsellor advocate, case manager, child protection officer, human resource manager, social policy officer, policy advisor, community worker, community development manager and mediator.

Professional recognition
This program is an AASW-accredited qualification. It is an entry qualification into the social work profession and has been determined to meet the Australian Social Work Education and Accreditation Standards (ASWEAS). Graduates are eligible for membership of this professional association.
aasw.asn.au

The psychology major in the Bachelor of Social Work (Honours)/Bachelor of Social Science (Psychology) is a partial requirement for membership of the Australian Psychological Society (APS).
psychology.org.au

It is also a partial requirement for registration as a psychologist with the Psychology Board of Australia, subject to further study or clinical practice.
psychologyboard.gov.au

Program structure
This double degree has its foundation in social sciences, psychology and social work. The core courses of politics, sociology, social theory and economics are shared with students from other degrees such as global studies and planning.

You will undertake two 70-day field education placements in your third and fifth years of the program. The third year placement focuses on direct practice with individuals, families and small groups. The fifth year project integrates theory and macro-level practice.

rmit.edu.au/programs/bh106

Entry requirements
You must have successfully completed an Australian Year 12 senior secondary certificate of education or equivalent.

Year 12 prerequisites
Units 3 and 4 – a study score of at least 30 in English (EAL) or at least 25 in English other than EAL.

Pathways
Graduates of the following RMIT programs maybe eligible for exemptions (subject to certain criteria):
- Diploma of Community Services
- Diploma of Alcohol and Other Drugs
- Diploma of Youth Work
- Advanced Diploma of Translating
- Advanced Diploma of Interpreting
Bachelor of Criminology and Psychology

Statistics indicate a strong correlation between crime and people with social welfare needs and mental health issues.

This combination of an accredited psychology major with an applied criminology major gives you the knowledge and skills for a wide range of careers in the justice and human services sectors.

This program equips you to become a frontline justice worker with a strong understanding of psychological theories and practice. You’ll learn to provide support services to offenders, clients and victims within the criminal justice system, particularly those with complex needs and mental health issues.

You’ll develop the emotional and intellectual resources required for a challenging but rewarding career in the justice and human services fields including policing, corrections, youth justice, customs, child protection and welfare services.

Career outlook
Graduates are prepared to meet the challenges of working at the frontline of organisations such as the police force and correctional services, customs, child protection, welfare and youth services.

Your communication, risk assessment, behavioural analysis and research skills will position you to find work in a variety of roles where dealing with people is paramount.

You could work as a victim support officer, police officer, investigator, corrections officer, drug and alcohol support services worker, policy writer, customs and immigration officer, crime analyst, security analyst and indigenous services liaison.

This degree also provides the academic foundation for those wishing to pursue a career in various areas of psychology, including clinical, educational, organisational, developmental and forensic psychology.

Professional recognition
The psychology major in the Bachelor of Criminology and Psychology is a partial requirement for membership of the Australian Psychological Society (APS), psychology.org.au

It is also a partial requirement for registration as a psychologist with the Psychology Board of Australia, subject to further study or clinical practice, psychologyboard.gov.au

Program structure
You’ll complete 12 psychology courses and eight criminology courses. A further four electives are available across the three years of the program.

Elective specialisations include criminal intelligence, forensic studies, drug-related crime, international policing, customs and border security, youth justice and terrorism.

You’ll be taught by specialised academic staff – for example, within your criminology major you may be taught by a former police officer, a lawyer or a criminologist. Industry-experienced guest lecturers will also feature throughout the year.

Entry requirements
You must have successfully completed an Australian Year 12 senior secondary certificate of education or equivalent.

Year 12 prerequisites
Units 3 and 4 – a study score of at least 30 in English (EAL) or at least 25 in English other than EAL.

Pathways
Graduates of the following RMIT programs maybe eligible for exemptions (subject to certain criteria):
- Diploma of Community Services
- Diploma of Alcohol and Other Drugs
- Diploma of Youth Work
- Advanced Diploma of Translating
- Advanced Diploma of Interpreting

rmit.edu.au/programs/bp295

Zachary Penrith-Puchalski
Bachelor of Criminology and Psychology

I walked into the degree thinking I would eventually become either a clinical psychologist within the legal/justice system or an alcohol and other drugs clinician, but while studying I’ve found that this degree can lead to many career pathways.
Master of Clinical Psychology

Psychology explores the science of the mind and human nature. You will examine mental states and processes and how they affect human behaviour.

RMIT’s psychology program applies research to actual situations to resolve real human problems. This program offers you the necessary training to become a registered psychologist.

The program is oriented towards cognitive-behavioural psychology and you will be trained and expected to work according to the scientist-professional model. RMIT has research expertise in the areas of clinical and health psychology, behavioural neuroscience, lifespan developmental psychology, and cross-cultural psychology. New areas of research include chronic disease and the ageing population.

The main areas of focus include:
- psychobiology of cognition
- stress, fear and anxiety
- wellbeing and resilience
- development across the lifespan
- innovations in clinical interventions
- mental health.

Career outlook
Clinical psychologists are specialists in the assessment, diagnosis and treatment of mental health problems and mental illness.

As a qualified psychologist you could work in a wide range of environments, including private practices, hospitals, general medical practices, community health services and universities.

Professional recognition
This program is accredited by the Australian Psychology Accreditation Council (APAC).

On completion you will be eligible for membership of the Australian Psychological Society (APS) and associate membership of the APS College of Clinical Psychologists.

On graduation from the program you will also be eligible to apply for registration with AHPRA (Psychology). Registration will allow you to practice in any Australian state or territory. Specialist endorsement as a clinical psychologist is possible after two years of supervised practice following completion of the Master of Clinical Psychology.

Program structure
The program consists of 192 credit points and focuses on these areas:
- mental health
- clinical interventions
- motor and cognitive development
- wellbeing and resilience
- cognitive, blended and e-health innovations.

The Master of Clinical Psychology is divided into coursework, clinical training and research.

In addition to lectures and group work, much of your time will be spent under supervision at the on-campus Health Sciences Clinic, treating clients presenting with a variety of psychological, educational and developmental problems.

You’ll also be required to undertake two practicum placements off campus in supervised psychological practice (minimum of 40 days and 60 days, respectively) in agencies such as hospitals, clinics and other health facilities.

Casework courses and field placements comprise a minimum of 132 days of practicum experience. You will also do a supervised research thesis.

Entry requirements
You must have completed an APAC-approved fourth year of study in psychology (honours or graduate diploma) with an average of 75 per cent or higher.

Selection tasks
You will need to access the Australian Psychology Post-Graduate Program Reference Request System to apply for a reference from academic and/or professional referees.

You will need to obtain one academic referee report and one professional or personal referee report. psychologyreference.org

Shortlisted applicants will be required to attend an interview.

Jerry Wang
Master of Clinical Psychology

The main reason I chose RMIT was because of the new Health Sciences Clinic, which provides dedicated facilities for psychology students. I feel privileged to be in a unique position to assist people with psychological concerns, which are often under-recognised and misunderstood in society.
Potential supervisors for 2019 are listed below. Research areas indicate the fields in which supervisors are experts and may be willing to negotiate projects. This list is not all inclusive and staff availability for supervision may vary from year-to-year. Complete program-specific supervisor lists are available at the start of the academic year.

Prospective honours students may contact staff to discuss project ideas, and to discuss projects that students have undertaken in previous years.
