

# Design fiction masterclass

Speculative design expert Dr James Auger from RMIT's School of Design is delivering this masterclass on design fiction – the new and highly innovative approach to explore and present original visions for the near future.

Tailored to the needs of participants, this course will focus on a particular emerging or 'disruptive' technology and use several well-developed methods to extrapolate the potential of the technology into near-future products, systems or services.

## Who should attend

- Designers working in emerging tech such as bio, synthetic bio, AI, robotics, smart and IoT
- Innovation managers working on alternatives to big systems and infrastructure such as energy systems, political, healthcare and transportation
- Entrepreneurs developing original products, systems and services

This masterclass can also be delivered as a bespoke masterclass in-house – get in touch if this is of interest by emailing [events.europe@rmit.edu.au](mailto:events.europe@rmit.edu.au).

## Price

€600 per person

15% discount for RMIT alumni
