PX #	PX 1	Days	5
Year	1	Assessment Category #	Novice
Semester	1	Title	TCHE2733 - Theory to practice A
Course Overview	This first professional experience course is designed to support the development of foundational skills in learning, teaching and reflective practice for pre-service teachers. Through their on-campus learning, preservice teachers are introduced to key concepts related to the brain, memory, and student learning. They explore common educational neuromyths and consider a small range of teaching strategies focused on promoting student motivation and engagement.		
These can and sho Education Handbo	views of focuses and responsibilities across the duratio buld be adapted based on local school context and clas bulk for Mentors and Pre-service teachers for general su	s scheduling at the time	e of placement. Please refer to the RMIT School of
Week 1 [5 Days]	Mentor Responsibility: Preservice teachers will be paired together for this placement. Please ask the pre-service teacher to explain the university's expectations including the need for you to check their written observations. Please explicitly model your intentional teaching and guide the pre-service teacher's focus on what are they observing and why. Please encourage your preservice teacher to ask questions about classroom routines and how to build positive working relationships with students. PST Responsibility: Observation & Engagement focus: Focus your observations on classroom routines; how your mentor teacher builds relationships with students; the varied types of learning activities used across the week. Planning & Teaching: There are no requirements to plan and teach full lessons. However, you are encouraged to assist in small group activities and daily routines with students as requested by your mentor teacher. Lead a warmup/ daily routine by the end of the week if possible. Reflection prompts: By the end of the week, ensure that you have had two reflective conversations with your mentor teacher including 1) What are the diverse backgrounds, experiences, and learning needs of students in the classroom? and 2) Why does your mentor teacher provide a variety of learning activities for students?

Reporting Requirements <u>Reflection prompts</u>: During this week, reflect on the following questions: 1) What is the difference in timing and transitions between small group and whole class teaching? 2) What makes an effective start to

PX #	PX 3	Days	15	
Year	2	Assessment Category #	Novice	
Semester	1	Title	TCHE2704 - Responsive Teaching	
Course	This third professional experience is designed to support PST learning about working collaboratively to support			
Overview	student and school improvement, and to improve classroom practice. On-campus learning has focused on			
	formative assessment and student feedback strategies, the use of rubrics to guide assessment of student			
	learning, and the development of clearly structured lessons that utilise approaches like explicit instruction and			
	effective questioning. During this placement, preservice teachers should be planning and teaching whole class			
	lessons that help them apply a range of formative and feedback strategies. By the end of this placement,			
	preservice teachers should be starting to experience sequential lesson planning and enactment that supports			
	their understanding of how to respond to student need and engagement.			

Teaching Overview

<u>Please note</u>: Overviews of focuses and responsibilities across the duration of placement are recommendations and should not be viewed as limited. These can and should be adapted based on local school context and class scheduling at the time of placement. Please refer to the RMIT School of Education Handbook for Mentors and Pre-service teachers for general support and requirements.

Week 1 **Mentor Responsibility:**

During this first week of the placement, please welcome your preservice teacher and support them as they settle into class routines and relationships. Begin modelling how you check for student understanding during lessons and briefly explain how this informs your next steps in teaching. Share examples of how you gather quick formative assessment data (observations, questioning, student work samples). Provide opportunities for your preservice teacher to enact small components of classroom routines or lessons when they feel ready. Offer simple, focused feedback of your preservice teacher's clarity of instructions and basic formative assessment strategies. By the end of the week, work with your preservice teacher to map out what they will teach across the next fortnight beginning with planning and teaching a minimum of one or two individual lessons and culminating in a two or three lesson sequence in one learning area.

PST Responsibility:

- Observation & Engagement focus: Observe how your mentor teacher checks for understanding during lessons
 through circulating, questioning, modelling, and noticing student cues. Pay attention to how these quick
 formative moments guide small, in-the-moment adjustments such as rephrasing, providing another example,
 or slowing the pace. Notice how success criteria or lesson intentions are used to clarify what learning looks
 like
- <u>Planning & Teaching:</u> In the first week, plan and teach parts of lessons or daily routines each day. Aim to plan and teach one full lesson by the end of the week. Planning should be sent to your mentor teacher for feedback at least 24 hours before a lesson.
- Reflection prompts: Reflect on the following questions: (1) What did I notice about how my mentor checks for understanding during lessons? (2) Which students did I observe closely today, and what did I learn about their needs or readiness for learning? (3) When I led a small learning task or routine, what evidence about student learning did I gather? (4) What is one aspect of responsive teaching I want to focus on developing next week?

Week 2 **Mentor Responsibility:**

Please continue to model and discuss how formative assessment guides pacing, differentiation and adjustments during teaching. Support your preservice teacher to plan and teach one or two full lessons, offering feedback on the success criteria, lesson structure, and how effectively they check for student learning. Encourage your preservice teacher to trial a range of formative assessment strategies and reflect with them on how the evidence gathered informs their next lesson. Complete the interim report with constructive and explicit feedback to help them refine their practice. Promote shared reflection so your preservice teacher can see the links between their planning, teaching, and evidence of student learning.

PST Responsibility:

- Observation & Engagement focus: Observe how your mentor teacher uses formative assessment (informal and formal) evidence (such as work samples, exit slips, responses to questions) to shape their upcoming lessons and/or modify tasks for different students. Notice how your mentor teacher identifies patterns in student learning across the whole class, including prominent misconceptions or uneven progress across groups. Pay attention to how multiple sources of formative assessment are used to contribute to more targeted assessment of student understanding.
- <u>Planning & Teaching</u>: In the second week progressively take on more components of whole-class instruction leading up to, planning and teaching a minimum of 2-3 full lessons by the end of the week. Lesson plans must be provided a day in advance and incorporate formative assessment strategies.
- Reflection prompts: Reflect on the following questions: (1) What formative assessment strategies did I use this week, and what did they reveal about student learning? (2) How did I adjust my teaching (pacing, explanation, grouping, examples) based on student responses? (3) Which teaching strategies were most effective, and why? (4) What feedback from my mentor changed or improved my teaching practice?

Week 3

Mentor Responsibility:

Please provide opportunities for your preservice teacher to increase independence by teaching multiple full lessons across the week. Continue to give feedback with a focus on how they analyse student learning and make responsive adjustments during and after lessons. Encourage your preservice teacher to evaluate their two or three lesson sequence, including what evidence of learning they gathered and how reliable it is. Guide them in strengthening decisions around differentiation, grouping, and pacing based on student need. Support your preservice teacher in refining their pedagogical reasoning, making explicit links between responsive teaching and observed impact. Near the end of the week, complete and discuss the final Placement Report with your preservice teacher.

PST Responsibility:

- Observation & Engagement focus: Observe how your mentor teacher evaluates student learning across a
 sequence of lessons, drawing on multiple forms of evidence to adjust their teaching. Focus on how
 pedagogical decisions are informed by the evolving data gathered throughout the week. Notice how your
 mentor teacher determines whether learning intentions have been met and what are the next steps students
 need
- <u>Planning & Teaching</u>: In the final week, you are to plan and teach a two to three lesson sequence in one learning area using formative assessment evidence to adjust your teaching and to support student learning.
- Reflection prompts: Reflect on the following questions: (1) What evidence do I have that students progressed in their learning across my sequence of lessons? (2) Which teaching decisions had the strongest impact, and how do I know? (3) How confidently did I adjust lessons "in the moment" in response to student need? How effectively did I differentiate for learners with different readiness levels? (4) What aspects of responsive teaching do I feel most confident about, and what will be my next growth focus?

		<u>Observation & Engagement focus</u> : Observe how assessment for learning strategies (self/peer assessment, questioning, exit slips) are used. Note how student progress is tracked and discussed in planning contexts.				
	 Planning and teaching: Plan and teach 3-4 lessons of a learning area sequence across the week. Incorporate multiple teaching 					
		teach. e . leadons on a leann				

- <u>Planning and teaching</u>: Plan and teach 3-4 lessons of a learning area sequence across the week. Incorporate multiple teaching strategies (explicit instruction, collaborative learning, GRRM, effective questioning etc). Trial at least one peer or self-assessment activity. Collect and analyse formative assessment data to adjust subsequent lessons. Adapt resources to meet diverse needs with mentor approval. Be sure to provide your lesson plans to your mentor at least 24 hours before the lesson is timetabled.
- <u>Reflection prompts</u>: 1. How did I use assessment to inform my teaching this week? 2. Which teaching strategies engaged students most effectively, and why? 3. What insights from and contributions to team planning have been useful this week and how can I take these into my practice next week?

Week 3 Mentor Responsibility:

Support the PST in planning, teaching, and evaluating a longer sequence of lessons. Provide guidance in designing assessment tasks and collecting reliable evidence of student learning. Encourage growing independence while maintaining feedback on practice. Please make a time to complete and discuss the end of placement report with your PST near the end of this week. **PST Responsibility**:

- Observation & Engagement focus: Observe how mentors use student data in reporting and communication. Track classroom and whole-school transitions. Observe student voice and agency how learners reflect on and direct their own learning.
- <u>Planning and teaching</u>: Plan and teach 1-2 lessons per day, including a learning sequence. Evaluate a sequence of 3-4 lessons, using formative assessment data and one trial summative task. Be sure to provide your lesson plans to your mentor at least 24 hours before. Take responsibility for managing routines, transitions, and behaviour throughout all lessons. Begin collecting artefacts and evidence that could later inform the GTPA.
- Reflection prompts: 1). What evidence of student learning did I gather, and how reliable was it? What would I do differently next time? 2). How effectively did I plan for learning progression across multiple lessons? 3). How has my understanding and development of my professional identity as a teacher grown over the past weeks? What has changed and what has stayed the same. Why.

and provide evidence of their "readiness to teach" in the classroom through the Graduate Teacher Performance Assessment (GTPA). The GTPA enables PSTs to showcase pedagogical decision-making across each stage of the teaching cycle — planning using data, learning and teaching, assessing, reflecting, and appraising impact. To complete the GTPA, PSTs are required to design and implement a learning sequence within one class, sustained over a minimum of four weeks. The sequence should address a single topic and be taught through a series of connected lessons. As part of this process, PSTs must demonstrate both whole class teaching and differentiated practice by identifying three focus students who represent the range of achievement levels in the class. Data collection occurs throughout the placement. Initially, data is gathered to inform planning and teaching decisions. As teaching progresses, further data is continually collected through formative assessment, including feedback to students. This evidence of learning should guide PSTs ongoing adjustments to planning and teaching. PST demonstration of practice should include: • making adjustments to meet the learning needs of all students in the class • making explicit connections between theory and practice • providing evidence of pedagogical decision-making, teaching practices, and learning outcomes • expressing your emerging professional agency in the teaching cycle While the GTPA is the core assessment task, PSTs are also expected to undertake a full professional experience load (three to four classes daily, in negotiation with the school and mentor). Tauching Overview Pease note: Overview of focuses and responsibilities across the duration of placement are necommendations and should not be viewed as limited these can and should not be viewed as limited. The provision of focuses and responsibilities across the duration of placement are necommendations and should not be viewed as limited. The provisions of focuses and responsibilities across the duration

These can and should be adapted based on local school context and class scheduling at the time of placement. Please refer to the RMIT School of Education Handbook for Mentors and Pre-service teachers for general support and requirements. Week 0 Before the placement begins, you are expected to visit the school to discuss requirements, gather data to inform planning and, where possible, observe classes and routines. Information Sessions for mentors will be available for Mentors this week Week 1 Mentor Responsibility: Please welcome and orient the preservice teacher to the class, routines, and expectations. Support them in identifying an appropriate learning sequence including the summative assessment for the GTPA (single topic, sustained over 4 weeks). Provide access to the kinds of data typically used in your classroom (formative and summative evidence at whole-class, small-group, and individual levels) to support their planning. Engage in initial conversations about differentiation and the three focus students, ensuring the preservice teacher can plan effectively. PST Responsibility: • Observation & Engagement focus: Observe whole-class routines, teaching approaches, and how students respond to learning. Identify learner diversity and begin conversations about differentiation. Build positive relationships with students and begin to learn their names, interests, and needs • Planning & Teaching: With mentor support, select the learning sequence topic for the GTPA and map out the 4-week plan. Gather diagnostic data and identify three focus students in the class selected for GTPA. Des						
Teaching Overviews of focuses and responsibilities across the duration of placement are recommendations and should not be viewed as limited. These can and should be adapted based on local school context and class scheduling at the time of placement. Week 2	Mentor Responsibility: Please support the preservice teacher in using formative assessment to adjust
	planning and teaching. Discuss strategies for giving effective feedback to students. Complete the Interim
	Placement Report at the end of the week and discuss strengths and areas for improvement with the
	preservice teacher. If you have any concerns or uncertainties at any stage, please reach out to the university
	for support.
	PST Responsibility:
	 Observation & Engagement focus: Observe student responses to teaching strategies and reflect on effectiveness. Observe student responses to feedback. Continue to engage with mentor and peers to deepen understanding of classroom dynamics.
	 <u>Planning & Teaching</u>: Plan and teach 3-4 lessons per day, including GTPA learning sequence and other classes. Collect formative assessment data from the class and focus students – don't forget to take photos of student work. Refine strategies for differentiation based on student needs and data.
	 <u>Reflection prompts</u>: How effectively did my lessons engage all students? What does the formative data reveal about student learning so far? How am I adjusting my teaching based on this evidence? How did I provide feedback to students, and how did they respond? What are my next steps in supporting the three
	focus students?
Week 3	Mentor Responsibility: Please continue to provide feedback on the PSTs teaching practice with a focus on refining pedagogy. Encourage preservice teacher independence in planning and teaching. PST Responsibility:
	Observation & Engagement focus: Focus observations on student progress and how different strategies impact learning. On the state of the state
	 <u>Planning & Teaching</u>: Plan and teach 3-4 lessons per day, including GTPA learning sequence and other classes. Implement formative assessment activities within the GTPA sequence; Document evidence of student learning for analysis in the GTPA.
	 Reflection prompts: What evidence do I have that students are progressing in their learning? How am I evaluating the effectiveness of my teaching strategies? How am I integrating theory and research into my decision-making?
Week 4	Mentor Responsibility: This week, please engage in moderation discussions with the preservice teacher to review the use of standards and criteria when assessing the work of the three focus students. At the end of the week, provide feedback on professional readiness for teaching by completing the Placement Report. If you have any concerns about a standard not being met, please contact the WIL team. We recognise that some standards (e.g. engaging with parents/carers or embedding Aboriginal and Torres Strait Islander perspectives) may not naturally arise in all placements. Where this is the case, they can be marked as NE (Not Evident). PST Responsibility:
	Observation & Engagement focus: Reflect on professional identity and readiness to teach. Ensure all materials are collected for the GTPA. Observe mentor's assessment and moderation practices.
	Planning & Teaching: Plan and teach as much of the week as possible. Finalise teaching GTPA sequence, collect summative assessment evidence. Moderate the three focus students with mentor teacher
	 <u>Reflection prompts</u>: How well did I meet the learning needs of the whole class and individual students? What connections have I made between theory, standards, and classroom practice? In what areas do I feel confident as I transition into teaching, and where do I need further development?
